625 POLYTHANE

When outstanding protection for your valuable business assets is an absolute necessity, the number one choice is 625 Polythane.

For the mining industry, agricultural machinery, plant and equipment, marine service or any other application where exceptional durability is crucial, this ultra-tough two-pack polyurethane direct gloss topcoat provides superior performance.

What's more, by retaining excellent gloss and colour over the long term, it keeps your valuable equipment looking great while enhancing the image of your business.
