COLOUR TOOLS

The SELEMIX® tinter system offers a comprehensive range of colour combinations that deliver outstanding colour accuracy. All leading international colour standards are represented as well as many industrial and public service colour references including those commonly used in public transportation, oil industry, international fleet liveries as well as agricultural and machinery equipment coating.

These include:

- RAL
- PANTONE®
- British Standard
- NCS (NATURAL COLOUR SYSTEM®)

Every colour is specially formulated in all of the four major product groups – Polyurethane, Synthetic, Epoxy and Cellulose – to guarantee outstanding colour accuracy whatever the required finish.

Selemix colour support includes high quality colour identification swatches, with access to almost 10,000 colour formulations easily accessed using PPG's *PaintManager* colour software.
