PRIMER

## NITROCELLULOSE PRIMER

Locally developed and manufactured using high quality ingredients, this nitrocellulose-based primer / filler is an ideal multi-purpose primer for a wide range of timber surfaces, from customwood and other medium density fibreboard, through to solid timber. It has been specifically formulated with unique characteristics that minimise the issues associated with the excessive wax content found on medium-density fibreboard.

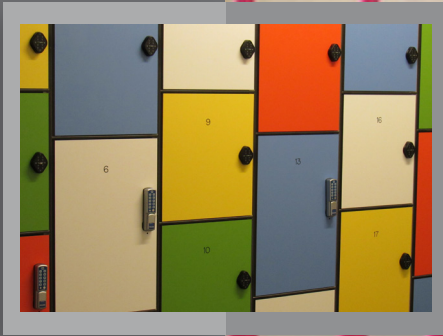

As well as delivering excellent adhesion and film-build, NCP Nitrocellulose Primer is fast drying (it can be sanded within two hours) and has excellent sanding properties and superior hold-out for subsequent topcoats.

# Commercial Performance Coatings

## BINDER

Commercial Performance Coatings Nitrocellulose Lacquer is a single pack, fast drying general purpose lacquer.

Potential uses are for high quality furniture, shop fittings, doors, cabinets, desks, panelling, partitions and most interior timberwork. Can also be used on suitably primed metals. Not suitable where aggressive solvents are likely to come into contact with paintwork.

What's more, by utilising the SELEMIX® universal tinter system, Commercial Performance Coatings Nitrocellulose Lacquer is available in excess of 10,000 colours including the AS2700 and RAL colour ranges, as well as a range of gloss levels.
