## PERFORMANCE ENAMEL TOPCOAT

PET Performance Enamel Topcoat is a single pack, alkyd based topcoat which has been formulated for dependable performance on all general industrial applications.

It can be applied over most properly prepared substrates, including metal, fibreglass, timber and existing paintwork in sound condition, and features good gloss, excellent flow and levelling and good durability.

Performance Enamel Topcoat (PET) is a premium topcoat with a fast dust-free time. Through the use of full gloss and matt binders, PET can be mixed in a range of gloss levels.

What's more, by utilising the SELEMIX® universal tinter system, PET Performance Enamel Topcoat is available in excess of 10,000 different colours from the AS2700 and RAL colour ranges.
