

PRIMER

PARAGLAZE CT 2K HP
EPOXY PRIMER

Perfect for heavy duty applications, such as commercial transport, agricultural equipment and the mining sector, PP-3450 Paraglaze CT 2K HP Epoxy Primer is a highly effective adhesion promoting primer with the option to be used in Wet-On-Wet (WOW) mode or as a traditional sand-able primer. When used in high productivity WOW mode, it can be topcoated after just 30 minutes with no need for time-consuming sanding.

Whichever mode it's used in, PP-3450 Paraglaze CT 2K HP Epoxy Primer delivers outstanding durability and solvent, chemical and corrosion resistance when

combined with 2K topcoat systems. It's suitable for a wide range of substrates, including bare steel, aluminium, stainless steel, cast iron, galvanised steel and fibre reinforced plastic. Along with excellent flow, appearance and gloss holdout, PP-3450 Paraglaze CT 2K HP Epoxy Primer also offers good filling and sanding properties. For additional versatility there is an accelerated hardener option, as well as the choice of four different reducers to cater to different application conditions.
