RAPID DRY ENAMEL

Commercial Performance Coatings Rapid Dry Enamel is a fast air-dry, spraying enamel based on a copolymer alkyd resin.

It is designed as a general purpose industrial enamel for use where speed of dry is important, and can be applied over most properly prepared surfaces including sheet steel, agricultural attachments, vehicle chassis, engines, cabinets and electrical switchboards.

What's more, by utilising the SELEMIX® universal tinter system, Commercial Performance Coatings Enamel Topcoats are available in excess of 9,000 colours including the AS2700 and RAL colour ranges, as well as a range of gloss levels.
